<sup>1</sup> DSHS Center for Health Statistics projected 2015 Texas population data <http://www.dshs.state.tx.us/chs/popdat/popup.shtm>.

<sup>2</sup> Infant botulism rates are calculated using the HSR populations under 1 year of age.

<sup>3</sup> Perinatal hepatitis B cases are defined as infants >1 months through 24 months of age. The rates were calculated using the HSR populations under 2 years of age, which approximates this cohort.

<sup>4</sup> Influenza-associated pediatric mortality rates were calculated for the HSR populations <18 years of age.
